Woven Concertina

This template creates a book that functions on 2 levels
1- As a basic accordion book with a main image/text for the front and a main image/text for the back
2- A book with 5 hidden or secret images, that feels like a Jacob's Ladder

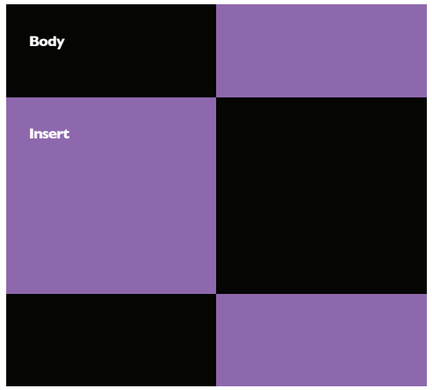

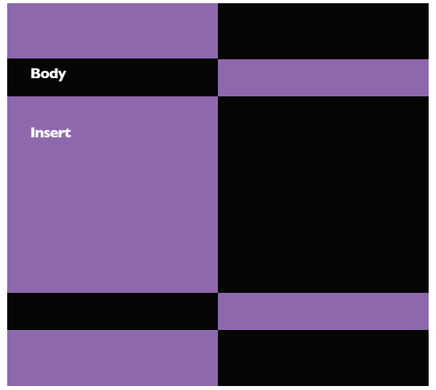

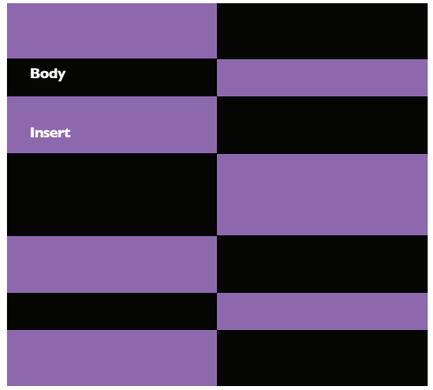

Levels

This template uses 2 levels of interweaving

But works as well with multiple levels

Print Templates

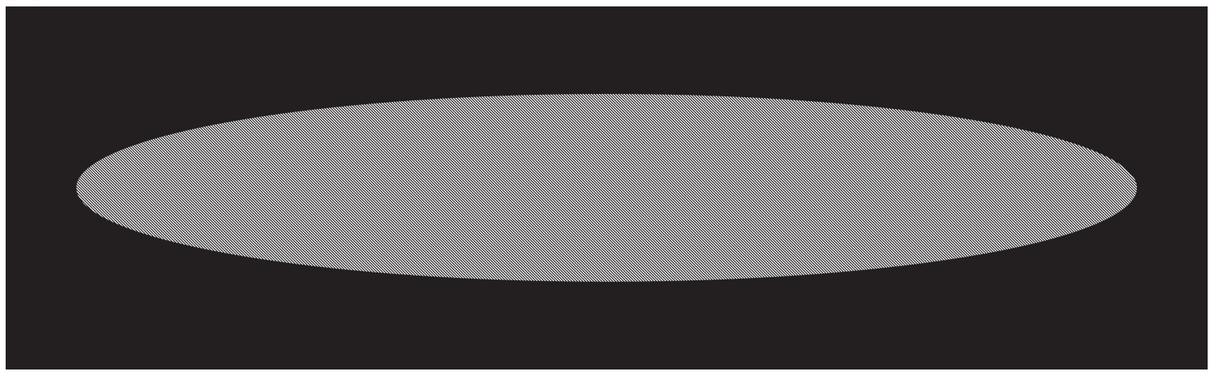

- The print templates use the example images below

NOTES

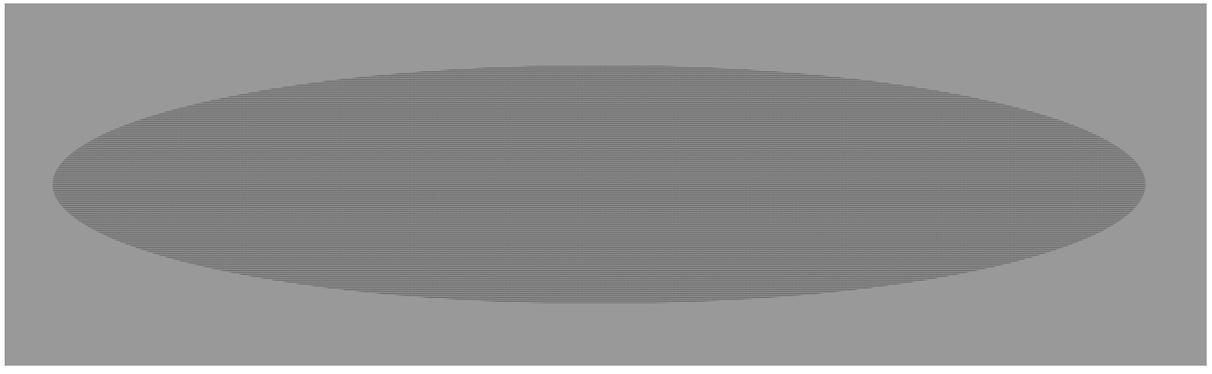

- Double check the registration when printing front and back
- **TEST the width of the insets** - these need to fit snuggly, but not exactly, in the body so that the book can fold. The exact width will vary depending on the weight of your paper
- On the insert templates, you could possibly place the insets next to each other, for fewer cuts. I have them spaced out because it gives some wiggle room when registration isn't perfect.
